

Rubén Brito

Software Engineer – Risk Systems & Applied AI

✉ britoruben1984@gmail.com · 📍 Madrid, Spain

🌐 [LinkedIn](#) · 🐙 [GitHub](#) · 🌐 [Portfolio](#)

👤 Summary

Software Engineer with over 10 years of experience across banking, telecom and consulting, based in Madrid. Currently at Santander UK, working on credit risk and scoring systems and leading a small development team. Delivered one of Santander's earliest Machine Learning proofs of concept in risk decisioning in 2017–2018; since 2024, deep into modern AI-assisted engineering – daily use of Claude Code, GitHub Copilot and other AI tools, plus building custom LLM agents for engineering workflows.

📁 Work Experience

Santander UK • Software Engineer

Nov 2019 – Present, United Kingdom (Remote)

- Own credit risk and scoring models; drive improvements to risk processes and controls across retail and corporate banking.
- Progressed from Software Developer to leading a small development team and advising technical architects on integration and security architecture decisions.
- Built an AI-assisted internal dashboard for live case monitoring, replacing manual SQL queries with real-time visibility.
- Use GitHub Copilot, Claude Code, OpenAI Codex, Google Antigravity and Devin daily for development and custom CI/CD workflows on OpenShift.
- **Java Python Spring Node.js Kafka Docker OpenShift**

UST Global Spain • Software Developer

Jan 2019 – Nov 2019, Madrid

- Backend and API development for Inditex's Center of Excellence, including a Kafka + Apache Flink real-time monitoring dashboard providing alerting and traceability across internal and external APIs.

Gfi Spain • Software Developer

Oct 2015 – Jan 2019, Madrid area

- Architecture department. Delivered software engineering services on external client engagements, including the Santander Global Tech and Telefónica placements below.

Santander Global Tech • Software Developer (external, via Gfi Spain)

Sep 2017 – Dec 2018, Madrid area

- Risk Department – delivered one of Santander's earliest Machine Learning proofs of concept, integrating predictive models into the risk decisioning workflow years before enterprise AI adoption became mainstream.
- Developed an API exposing risk prediction functionality for sales and financial products.
- Requirements analysis, architecture design and development, using Agile methodology.
- **PMML R Python Spring Boot TIBCO BW 6 IBM API Connect AngularJS**

Telefónica • Software Developer (external, via Gfi Spain)

Jan 2016 – Dec 2016, Madrid area

- Telco 3.0 project – implemented REST architecture in the customer retention system.
- Requirements analysis and technical documentation, using Agile methodology.
- **Oracle BPM Java Spring AngularJS**

🎓 Education

Enrique Tierno Galván

2013 – 2014

Higher Education in Multiplatform Application Development

- Spanish higher vocational qualification (Ciclo Formativo de Grado Superior). One-year program: first-year credits transferred from the Web Application Development qualification below.

Domenico Scarlatti

2011 – 2013

Higher Education in Web Application Development

- Spanish higher vocational qualification (Ciclo Formativo de Grado Superior).

</> Technical Skills

Languages Java, Python, JavaScript / Node.js, R

Cloud & Platforms AWS (S3, Lambda, Athena, CloudWatch), Terraform, Docker, OpenShift

Data & Streaming Kafka (MSK & on-premise), Redis, Oracle, MongoDB, SQL, NoSQL

Integration & Middleware TIBCO BusinessWorks, Oracle SOA Suite, API Gateways (IBM API Connect/DataPower, CA), OAuth2 / JWT

Observability Kibana, Dynatrace, Zipkin, Grafana

Testing & Quality Cucumber, Postman, Bruno, JMeter, Chaos Monkey

AI Coding Tools Claude Code, GitHub Copilot, OpenAI Codex, Google Antigravity, Devin

AI & Automation Custom LLM agents (MCP: GitHub, Jira, Confluence, SonarQube, Elasticsearch), LLM-based predictive modeling, prompt/plan engineering

Practices Microservices architecture, REST APIs, Agile methodology, ETL & data modeling, CI/CD (GitHub Actions, Jenkins, GitLab CI)
